Night Owl REACTIVE

24x7 AND 9x5

Who has time to work around-the-clock?

We do.

Timing is everything when IT issues arise, and how quickly they can be resolved starts with how quickly they are identified. Night Owl 24x7 and 9x5 Reactive services do both so you are immediately aware of any problems and have the security of knowing that we are expertly handling them for you. We focus on your IT, so you can focus on your business.

What is Night Owl 24x7 Reactive?

This 24x7 service responds to any problems stemming from predetermined critical network devices. We track issues by contacting the carrier, contacting the hardware vendor, and/or working with your staff, such as your Help Desk. Clear North Technologies guarantees a 1-hour phone response with this service. Additional fee-based response options are available, include 2-hour remote response (if provided access), and/or 4-hour onsite response. Alerts are escalated quickly and appropriately, with down situations receiving the most immediate attention.

What is Night Owl 9x5 Reactive?

This 9x5 service is identical to our 24x7 reactive, but falls within the 9 hours/day + 5 days/week timeframe and excludes weekends and holidays.

BENEFITS:

- Get critical systems up and running quickly after failure
- Inexpensive reactive pricing
- Combined with Night Owl™ monitoring, alerts will be reacted to on performance counters or up/down status
- We can help you with full support
- No need for extended staff hours
- System in place in case of failures
- Peace of mind knowing experts are on hand to aid in system diagnostics
